

Team Tators Newsletter

September 2011

In the month of September Team Tators began working on last year's robot and trying to stay ahead of the game. Everyone is working diligently and staying

focused on the task ahead.

The team started coming together every Friday, Saturday, and Sunday working on programming, electrical, and mechanical components of the robot. Here the students are learning more and more with each

coming day and coming up with great ideas to use for this coming season's competition.

The team also had a car wash to raise money for the team at Les Schwab over on South Cole Road. The turn out was great and we had a lot of cars come through to get washed and make donations to the team. At the end of the car wash, everyone was tired but had fun and learned a little about the value of hard work.

We are updating the website and should have it looking in tip top shape in no time.

We will have more information in next month's article. Have a happy October!
